Good evening,

Thank you for the July 7, 2026 response regarding P009497-062226.

I note the acknowledgment of the delayed response and the confirmation that the County has identified nonexempt records responsive to the request. I also note the statement that responsive materials will be produced on a rolling basis, with an estimated completion date of November 20 2026.

Please confirm the anticipated date of the first rolling production. Because the letter states that non exempt responsive records have already been identified, I request that those records be produced as they become available rather than holding completed portions until the estimated final completion date.

I also note the letter's general reference to potential exemptions and privileges. I will review any actual withholdings and the stated legal bases for those withholdings as rolling productions are made available.

Please confirm that P009497-062226 remains open and active pending completion of the rolling production.

Thank you,

Leslie Scott Schlag

TO: "El Dorado County Public Records Center"[eldoradocountyca@mycusthelp.net]

Good evening,

I am following up regarding Public Records Act request P009497-062226, submitted through the County's Public Records Center on June 22, 2026.

As of July 6, 2026, I have not received a determination stating whether the request, in whole or in part, seeks copies of disclosable public records in the possession of the Sheriff's Office, the reasons for any determination,

an estimated date and time of availability for any disclosable records, or written notice invoking an extension based on unusual circumstances.

Government Code section 7922.535 requires an agency, within 10 days from receipt of a request for copies of records, to determine whether the request, in whole or in part, seeks copies of disclosable public records in the agency's possession and to promptly notify the requester of that determination and the reasons therefor. If the agency determines that the request seeks disclosable public records, it must also state the estimated date and time when the records will be made available.

The statute permits an extension based on unusual circumstances through written notice setting forth the reasons for the extension and the date on which a determination is expected to be dispatched. The extension may not exceed 14 additional days.

The Sheriff's Office's own Records Maintenance and Release Policy also addresses this deadline and process. EDSO Policy Manual section 804.4.1(c) states that either the requested record or the reason for non-disclosure will be provided promptly, but no later than 10 days from the date of request, unless unusual circumstances preclude doing so. The same section states that if an extension of up to 14 additional days is authorized, the Office shall provide written notice that includes the reason for the extension and the anticipated date of the response.

By my calculation, the 10-day determination period expired on July 2, 2026. I have not received the required determination or a written extension notice.

To avoid any misunderstanding, this notice concerns the statutory determination deadline and the Sheriff's Office's own stated records-request process. I am not asserting that all responsive records were required to be produced within 10 days.

Please promptly cure the missed determination deadline by providing the determination required by Government Code section 7922.535, including the reasons for the determination and, where applicable, the estimated date and time when responsive disclosable records will be made available.

Please also explain why the required determination or written extension notice was not provided within the statutory period or in accordance with EDSO Policy Manual section 804.4.1(c). If the Sheriff's Office contends that unusual circumstances existed under Government Code section 7922.535 or EDSO Policy Manual section 804.4.1(c), please identify the unusual circumstances relied upon and explain why written extension notice was not provided within the original determination period.

If the Sheriff's Office believes that a determination or written extension notice was timely transmitted, please identify the date and method of transmission and provide a copy.

Please keep P009497-062226 open until the required determination has been provided and any responsive disclosable records have been produced or otherwise lawfully addressed.

I am preserving the request history and reserve all rights and remedies available under the California Public Records Act.

Thank you,

Leslie Scott Schlag
